Followed by a social hour with light dinner

Location: The Historical Society of Pennsylvania
1300 Locust Street

RSVP: info@pachs.net

*Please download paper at www.pachs.net
and read it in advance.*

The Philadelphia Regional Colloquium in the History of Science, Technology and Medicine continues with an examination of the hidden, but powerful, vestiges of traditional race-based metrics of talent in university science and engineering programs. **Amy Slaton** is associate professor and assistant department head in the Department of History and Politics at Drexel University. She holds a Ph.D. from the History and Sociology of Science program at the University of Pennsylvania and is the author of *Excluded from the Future: Historical Perspectives on the Under-representation of African Americans in Engineering*, forthcoming from Harvard University Press.

This colloquium is made possible by an educational grant from Merck & Co., Inc.
